Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to since it appears that they include new subject matter. In particular, Fig. 4 submitted September 17, 2007 discloses side rolling systems (14). This subject matter must be canceled unless there is support for it in the original Specification.

Specification

2. The amendment filed September 17, 2007 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: "side rolling systems 14". Applicant is required to cancel the new matter in the reply to this Office Action.

Allowable Subject Matter

3. Claims 1-5 and 9 are allowed over the prior art of record since the prior art does not disclose a training bench for supporting a bicycle wherein the bench includes a framework having parallel rollers that are engageable with the front and rear rollers of the bicycle and a central support for elastically supporting the pedal crank portion of a bicycle to allow the bicycle to lean and move laterally from side to side wherein the central portion includes a platform disposed on transverse bars, an elastically deformable anchoring system and a vertical column supported by the anchoring system to support the bicycle.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Cassini '983 discloses a bicycle stand having rollers and a means for supporting the bicycle to allow it to move in the transverse direction and limited deviations from vertical but the means does not include an elastic anchoring means having a vertical column for supporting the bicycle.

Wun '818 discloses a cycle stand having an elastic anchoring support but it does not have rollers or the ability to allow for an engaged cycle to move transversally.
